Thread: [Private Internet Access VPN 656 Days left](#)

Astonished - *October 27, 2024, 7:31 am*

Looking to get rid of my personal PIA account, has 656 days left on subscription. Reason for selling is I can't get the desktop app to work on my PC at all, followed all troubleshooting and network setting resets and it just won't work.

Will let it go for \$20 or send me offers.

Prefer crypto or cashapp

Is private internet access vpn like mullvad where it is an account number login?
or how does it work maybe intersted in buying this

Does have a username and password but believe they passed some sort of security test/audit etc in the last few years. I'll try and find the article. Does indeed have most of their service dedicated towards privacy as far as I have read.
