Thread: [START YOUR OWN CRYPTER! | SOURCE | Code Injection | currently 3/35 | CRYPTER](#)

Py_Dev - October 29, 2024, 1:16 pm

Selling my source code for my encryptor. Its currently 3/35 and too lazy to continue with the project. Click on the sig if you want more details about the code.

- Code injection via create thread
- UAC bypass (patched with recent update by windows)
- ASMI bypass
- Startup/Persistence
- c# injector
- Junk code generator
- File hide
- Digital Signature rip
- Python encryption | AES-CBC Mode | HMAC verification

[Video: <https://www.dailymotion.com/video/x96zrgw>]

With purchase you will receive three different builds. One is a "normal injection" and the other is a dll injection. These source codes would be great for someone who wants to know how encryption work overall and would like to build upon them, even start your own service.

Price: 600 BTC.

Thank you man! Enjoy it!

09ill - January 13, 2025, 3:40 pm

Please pm me I am interested

Py_Dev - January 20, 2025, 6:03 am

Added another method to this. So it's not just injection methods. This is a method to concert c# files to byte array, obfuscate the array and the loader program that decrypts the bytes and executes.

Py_Dev - February 6, 2025, 7:09 pm

One copy left for sale.

Chorozon - February 7, 2025, 3:44 pm

I bought the 2nd copy while working on my own Crypter and got a crazy good deal 3 different sources easy worth the money and smooth deal

Py_Dev - March 6, 2025, 8:12 am

hmu if you are intersted willing to do \$500 just for today!
