Thread: [mastering a skill/subject](#)

DemoTester - October 30, 2024, 7:49 pm

If you could instantly master any skill or subject, what would it be and why?

Speak every language skill. I want to travel the world and being able to speak the native language of wherever im at makes me think it will really bring all of us together.

For me, I would want the skill of being able to learn other skills quickly, in a short amount of time. I think this sounds kind of like a loophole, but it would genuinely be pretty cool to just pick up any random skill and get pretty good at it within a month or two.

I didnt even think about that. It would be very beneficial.

Definitely programming, if I had to choose :

1. C/C++
2. Assembly
3. Python

Game - October 31, 2024, 2:38 am

I would choose programming in game design. I have so many ideas, I just wish I could bring the into fruition.

Lefty - October 31, 2024, 4:03 am

Probably engineering. It would come so useful in so many ways

Nettspend - October 31, 2024, 4:37 am

I would say math because I completely suck at it

Yeah, that's very true. Engineering is a big part of the world today, and it's going to continue to grow and develop in the future, so it would be a pretty good skill to have.
