Thread: [Influencer Promotions](#)

Prawnster - October 31, 2024, 6:01 pm

Hi guys,

Looking for some of you maybe that run stat accounts or have a good influencer account.

Need some promo work for one of my lil test sites.

10k+ followers ideally on your account that you'll be promoting with.

Will negotiate the price for you posting something to your followers.

I'll need to know the account it's being posted on so I can check the follower quality etc, USA audience is ideal.

Niche wise, this is a get-paid-to type site so the average person likes sites like these.

Works well with ewhore/Onlyfans type accounts too so I won't rule those out if you have a model.

This isn't a one off post, we start with a trial post that you'll obviously be paid for and then depending on the type of traffic your post brings, we can work out an on-going arrangement if I'm happy with the results.

Platform wise, can be on like insta, facebook, tiktok, youtube, twitch etc - I'm not fussy as long as the traffic is good.

ALSO:

If you know any other influencers that would work with me on this, I'd happily pay a small % of the initial deal I make with them to you as well.

Thanks.

What's your budget? I can do some promotional work for your depending on exactly what you're looking for. I understand you want T1 audience, preferably high in USA. But how much promotion are you looking for? You mentioned 10k ideally. Are you looking to gain 10k followers to your account, or you're referring to a 10k follower account doing the promotion for whatever it is you're posting?

Literally just need a single post on the feed of a 10k+ follower account.

Normal pricing is around \$100 for 1 post sso I'd happily pay that or more if the engagement is good.

Don't need any promotion to grow my account to 10k, literally just a promo post on an already grown insta/fb/yt/tiktok with existing, active followers.

Be extremely cautious about who you do business with. Look at their past promotions and check the engagement.

I used to run an SMM panel and it is so common for people to go to a panel, load up tens of thousands of followers or likes. Then they can even setup where bots automatically engage with the post and make fake comments. It's very very common. To the point where unless it was someone actually relevant I wouldn't pay.

Yeah been doing this for like 5-8 years haha so know what to look out for.

Just thought I'd test the HF waters for once instead of avoiding it all together :D

Sorry, I don't do single post promotions. I have a large mother child/fan page network, thought you were saying you were interested in growing your account to 10k.

No worries, thanks.
