Can you provide a sample to a desired email address? If you can prove to me that it actually works as you described, I will purchase the same day.

Also, if someone's account is new, they will definitely provide a vouch copy to you [Mooooookie](#) or someone with a trusted score and good reputation. It looks promising, but I'd like to learn more about it as well.

Diddy forced me to create the service in his name, I was captured and tortured in his basement by having 4-5 bottles of baby oil shoved in my mouth every single day... After 2 months of being absolutely tortured by P Diddy and escaping the basement, I received a letter in my mail stating that if I make any service it has to be in his name, so yes, baby oil is required otherwise same faith will come your way

OP did indeed offer me a vouch copy, but I declined the offer as I wasn't interested in going on Telegram.. but I would definitely implore someone else to take a sample test and come back and leave a review so we can get this man some sales(and I'm curious if it works as good as he's saying).

I am indeed looking forward to this. Please keep us updated, and let us know when the site is ready. When it's available thru the site, I will definitely use it. I was actually looking for this exact type of service/program a couple months back and surprisingly no one on-site could deliver.

Well good news! You can now officially visit our website, we've also added an API so you can send out attacks while not even being on the site and make cool things like bots etc, currently there aren't really API docs, but should be simple to understand by going in dev tools and checking the requests, about the website itself, we made sure it is user friendly and easy to understand, you simply login with a license key instead of email:pass like other sites do, to respect all our user's privacy and it just makes things more simple! <3 - diddy.pw
