Thread: [Locating phone numbers](#)

ryggg999 - November 2, 2024, 12:39 pm

Sorry if this is the wrong spot to post this*

Does anyone know any good places to locate phone numbers? Besides the basic-Fastpeoplesearch, Snusbase, etc...

G-DillahKillah - November 3, 2024, 4:52 am

I'd be happy to assist but you'll need to be a bit more specific in your request.

Can you rephrase "locate phone numbers"?

- Find a phone number based on a name or vice versa?
- Find general geolocation of a number?
- Find sites with a registered users phone number?
- Something else?

Are you equipped to use programs written in...

- Python
- Go
- C++
- etc.?

Or are you strictly looking for online resources?

Is there any way to find full name and location from phone numbers? Or any info regarding the owner of the phone number?

ryggg999 - November 4, 2024, 10:34 pm

This, I can do. DM me

There's plenty of ways to find the full name if it's registered to that phone number in most countries but it usually will depend on the country other than looking at data leaks like you mentioned

I mean if you're just looking for a free clearnet site to do that you can use numlookup.com.
