Thread: [Working on my own stealer \[ANACONDA STEALER\]](#)

Maur0 - November 3, 2024, 1:22 am

Hello folks, some time ago I was thinking on a new project to do, so I diclde to make my own stealer. Currently, I am working on the dashboard, and this month most probably I will release it on the market.

The web panel it gonna includes a login system, the main panel, and another page to see the stats. I am still currently working on the stats page, where I want to show the all infected devices, countrys based on the wordmap etc.

On the panel side, it gonna includes some filters like filter devices by country, by domains, (lets say you want to show devices that has paypal.com on their logs for example; cookies:paypal.com or credentials:paypal.com)

Also I will add the country flag based on the ip so the user can easily know the country to login with cookies + proxy.

The stealer gonna steal CC, cookies and credentials from browsers like Firefox, Chrome, Brave, Edge etc.

If you have any good ideas to improve them, I am glad to hear.

I have to change some colors, also the name on the stealer that is showed on the panel and some thing more.

xoxothesis - November 3, 2024, 1:24 am

looks damn good.

will be looking forward to the finished design.

Mooooookie - November 3, 2024, 1:02 am

Nice GUI. Good luck with your project.

Uolcan - November 3, 2024, 1:14 am

nice work loved your GUI and the use of colors , i face many problems with my own logger GUI as i am not very good UI/UX designer

FusionShield - November 3, 2024, 5:47 am

The GUI looks very good and your use of color is very good in the background. I wish you success

LeetSpeed - November 3, 2024, 4:20 pm

I like the layout of the GUI. I'll be looking out for this. When do you plan on releasing this tool?

hoangdoan - November 3, 2024, 5:59 pm

It's really exciting! I'll be one of the first customers, but I might need to use it to see what it's missing. Do your best, friend!

temmont - November 9, 2024, 4:47 am

UI reminds me of vista jungle theme

glocos - November 13, 2024, 5:12 pm

Nice work brother are you looking to also build an in house crypter or outsource it? Also are you looking to target win or mac ?

Tyr - November 13, 2024, 5:14 pm

I got heavy Linux Mint vibes from this. Clean UI. Best of luck.

narubasu - November 14, 2024, 3:07 am

Pretty impressive work. Released yet?

I have to change some colors, also the name on the stealer that is showed on the panel and some thing more.

Nice job but is there any chance adding outlook password recovery?

Good luck.

Maur0 - November 16, 2024, 9:54 pm

Web Panel is finished, I am working now on the stealer code itself.

This is the second time that I tried to apply for the vendor role, and I got declined again. For this reason I wont be able to sell it on this forum

MaDTiA - November 30, 2024, 12:28 pm

impressive gui frontend but a bit to much green, icon for login are overlapped with background but is very cool tho! maybe i missed the line but what lang will be the pe ?

Jayjonjah - December 1, 2024, 9:21 am

NICE design and concept. Keep it up

Blezebul - December 2, 2024, 3:02 pm

UHQ design I can't wait to see the final version

marlboromaaan - December 3, 2024, 5:56 am

Dude that is so cool. Looking forward to it.

elcharro - December 11, 2024, 7:30 pm

let us know when it be done please

handydandy2222 - December 12, 2024, 10:26 am

ok bro when will this hit the public. interested.

absolutely legendary, what coding language are you using?

Pakistan - December 27, 2024, 10:04 am

can't wait to see the final version

\$!uo2H%gE# - December 30, 2024, 11:48 pm

Gui looks really nice. You finished it already or still in proces?

ChrisDubai - January 1, 2025, 4:02 am

Messaged you, check !

I have to change some colors, also the name on the stealer that is showed on the panel and some thing more. How does it get the location, does it request geolocation or is it via ip or something because using ip isn't very accurate

psychonaut34 - February 17, 2025, 8:42 am

Nice ui bro, what language or framework are u using for?

nowirenolite01 - February 21, 2025, 2:22 am

why not include on the stealer Recoveries like Thunderbird, foxmail and outlook
