Finally on HF, eh Zhark?

Happy to see your loader being advertised here now, GLWS.

I can't offer any official vouches due to HF rules, but I can vouch for the seller himself. He has proven that he is very competent and capable, and I've heard nothing but good reviews regarding his products and services.

Good luck again, mate :D

Thank you for your support for both me and my project, i really enjoy your sincerity and honesty.

Thank you and GLWS.

What exactly is this used for? Is this a botnet or are you selling bots?

It's a loader botnet, you need to acquire the bots separately. It's similar to other loaders like Amadey and SmokeLdr

Pls be aware that Amadeus was the person on bf who was trying to extort xloader for 2k after giving vouch copy. please be wary.

Now I'm curious about this, what do you mean by trying to extort? Since xLoader is hosted on seller's servers, the only thing he would have had is the client. Surely there wasn't much, if any, leverage there.

He was claiming there was SQL injection on xloader panel exposing user data
[xloader](#) told him to fuck off and now he's butthurt.

DWC, OP. 1 Vouch copy to the wrong person under wrong pretense could harm sales.

I have heard positive things about zhark from the expl and generally, all is well. GLWS

Lmfao, what an idiot. Glad to see xLoader didn't take any bullshit at least. Definitely worth noting though.
