Thread: [Call landlines in the USA or Canada for free and anonymously.](#)

kazuma - November 5, 2024, 5:44 pm

This can simply be really useful for people like me outside the USA/CA and I highly discourage any abuse these services are mainly kept alive for visually impaired people and so giving them grief would be a really shit thing to do.

Step 1. Download Skype and make an account this lets us make free calls to toll free numbers without adding a credit card or any payment information.

Step 2. Dial 1-800-FREE 411

This is a toll free directory assistance line they will forward your call to your desired recipient. Ignore the first part of the dialogue this is from their sponsor who is paying for the call.

The dialogue will be as follows

"Welcome to direct-tv get entertainment your whole family will love switch today press the star key to connect to direct-tv"

Ignore this and it will then ask

What City and State?

Follow the voice prompts to identify the number you're trying to call and then wait until she offers to connect the call if you press 1 then it'll ring the number you've selected for free.

Extra tips:

If you need access to a different country this method can be replicated by finding other directory assistance lines still in service they are getting less common over the years but those are the keywords you're after: directory assistance hotline.

Obviously use a vpn to sign up for skype if you value your privacy and what not.

I hope this guide is up to standard If not I'd appreciate any feedback on how to provide higher quality tutorials! ?
