I have not actually ever flown a plane, but it seems like a pretty cool thing to do!

I have flown a plane as part of my RAF Cadet training. I am no longer doing said training but it was an interesting part of my life.

Negative. I have never flown a plane, although I did want to be a pilot when I was younger. Since I was lucky enough to be able to go on a plane when I was younger, I got to see the cockpit and how sophisticated it was, with all the different buttons and levers all over the place.. which intrigued me to want to be a pilot. The dream never did come true, but it's still something I would love to learn how to do one day.

I had a similar experience as a kid which led me to try out being in the RAF as a cadet. Flying a plane is peaceful and a nice experience.

No, my buddy from middle school was getting his pilot license when he was 14 or 15, said he got to have control of the plane for a few mins while he was doing some training or a test.

Unfortunately, he is not around anymore, passed away in a motorcycle accident, he was a good genuine guy...

I have not, I wanted to go to flight school when I was younger and I almost did. never happened

though. Most I got is Microsoft Flight Simulator lol.

Yoet - November 9, 2024, 12:37 pm

Sorry for your loss man.

Motorcycles are great, but so dangerous; no matter how well you can ride, there's other fuckers out on the road who can't and end up killing someone.

Stay safe yall!

It's good fun, personally flown a little cessna for 11 hours now, Go for a trial flight somewhere you might end up wanting to get your license!
