Thread: [Severe brain damage from abuse and drugs](#)

SIM-5022267 - November 11, 2024, 8:53 am

My brain's function level is so significantly impaired that I fell prey to an easy phish attempt. I misread the email mistaking "Microsoft" for "Minecraft" and gave out the 2FA code. fuck my life man, why is my brain so fucking dead.

i had to go through severe abuse by evil doers, and resorted to drugs to cope, now my brain is just not working. PTSD brain damage + drug brain damage, great combo. these disgusting dogs really sucked the life out of me, 10+ of these f4ggots leeching and stalking off of my creativity and life for years, fuck this life man.

the phisher stole my Minecraft + Microsoft email account, changed email, phone number, password. Stole all my ingame \$, high tier items, 9+ years old account that I made since 2013.

my brain is beyond fried, what I went through is as damaging as having CTE from boxing.

Quit smoking weed then lil bro.

T3n - November 11, 2024, 8:53 am

That's why you don't do drugs. Those impact memory, damage your neural system and more....

This can happen to the best of us, dont worry too much

Omniscient - November 13, 2024, 11:17 am

Your brain is fried from playing 9 years of Minecraft.
