Thread: [Hiring someone who can use spoof an in-app camera](#)

HaloFan117 - November 13, 2024, 8:09 am

Hello,

I'm looking for someone who can develop an app/tweak/software that can spoof a camera used by a specific dating app (it's not [BRAND NAME REMOVED], Bumble, [BRAND NAME REMOVED] or any of the popular ones), being precise I want to select a gallery image when it asks to take a picture for verification. DM me if you think you can do this and we'll discuss further details.

Thanks.
