You are looking for the phone number?

If you have the name and some kind of location (since you have fb) truepeoplesearch can sometimes help.

If its gmail, this can sometimes turn up some results that can help, gmail-osint.activetk.jp

yo this place is actually really useful: gmail-osint.activetk.jp

but it requires you to already know the Gmail of that person

I wanna know if someone knows a place where you can just plug in the person's name and get Gmail results that are legit ofc!
