## About Oasis

Welcome to Distribute, where we are redefining the landscape of AI compute and inference through innovation and decentralization. Our mission is to empower both business and consumers through collecting and connecting them with the largest network of decentralized compute.

## AI Inference

Users can quickly and efficiently access top models across LLM's, Image gens, and other AI tools at their fingertips through our Distribute platform. As open-source models continue to improve at a rapid pace, our decentralized network allows Oasis to continue providing inference at scale with frequent updates to our offerings for consumers.

## Providing Compute

Through our browser extension and desktop run-time, users can quickly onboard, schedule, and provide compute at their convenience without any barriers or continued maintenance. Simply signup, install, and begin contributing to the largest decentralized compute network.

## Developer Access

For developers, accessing cost-effective compute resources is essential for entering the AI space. Distribute offers enterprise-grade APIs supported by a robust network, reducing barriers to AI development and deployment.

## Our Vision

Decentralized compute and inference in their current form are fundamentally broken. Compute needs to be easier to provide and inference needs to be more agile and freely available. At Distribute, we are distinctly focused on creating the easiest onboarding and inference platform available.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley
