Thread: [Ill do your voice verif for e whoring.](#)

As you know sometimes, your customers are asking for precise voice verification, and it's kinda boring because actually the most important thing in this business is CONFIDENCE. Everyone knows even the dumbest buyer that catfish are uncountable...

So as a girl :

- if u need to reassure a client that you are losing / to reassure one that you'll get i can do a personalized voice note.
 - if u need a synchronized video with my voice (i wont show me just the video of your model) to be trusted.
 - if you need a certain pack of audios that u would use again for other clients i'm here.
 - i can do some small calls too (only by voice) (if its a video call only hair / some words) to reassure your customers.
- (for this i can log in to your account it depends,) or i could just send you the audios and you will just have to bring your phone closer to the speaker on which you put the audio on your computer or other...

Good to know : i'm french so i can do it in french, and i got a french accent too i can tone it down.

Prices :

- for a simple voice note (less than 10 seconds) (4\$) + add 2\$ every 10 seconds.
 - for a 10 voice messages (20\$)
 - for a verif call less than 30 seconds (15\$)
- (i can do on request some verif piictures too, with papers, finger sign + voice ... (i won't show my face)
