I bet over 100K in bytes within 30 day period. I essentially kept betting everyday whatever money I made back.

Just be more active on the Lounge and it will not be harder for you to achieve that award. It can only takes you a week or less specially when there is an award goal like what we had last time the Octoberfest 2024.

100k bytes though is like \$100

You don't need to spend it at once. You have 20K. If you bet that 5 times. You will achieve 100K threshold and hence the award.

It's basically bet 20K => get 40K back if you win.

Bet 40K => get 80K back if you win.

Bet 80 => get 160K back if you win.

Assuming here you are betting on a 2.0 odds event. But of course you can bet on any event with differing odds and it would be a good idea to diversify rather than going all in and going bust to 0 bytes.

I don't know a lot and I think I barely made any money over the long run. It was basically a

breakeven. It's really hard cause a few loses can really empty your bankroll. But it can become an addiction. Hence you see many gambling addicts that go broke.
