Thread: [Proxies that work to make reddit accounts without ban](#)

nora - November 17, 2024, 11:37 pm

Title says all, proxies that won't get my reddit accounts banned.

You also require a anti-detection browser alongside your proxies, then a few additional factors to warmup the accounts. Its not only proxy related, there are a few things to consider.

Use a 4g proxy, and anti detect browser such as GoLogin, and you should be fine. Make sure to rotate IP, in between each account. Mobile IPs can't be flagged like residential IPs and datacenter.
