Thread: [Keylogged bypassing 60 +/- anti virus](#)

dghhhh - November 26, 2024, 5:54 am

i spend some time on finding sc code to bypass so if u want the virus u must sub on yt [deleted]
and send screen shot on dc [deleted]

first file :

<https://www.virustotal.com/gui/file/e3b0c44298fc1c149afbf4c8996fb92427ae41e4649b934ca495991b7852b855>

second file :

<https://www.virustotal.com/gui/file/e3b0c44298fc1c149afbf4c8996fb92427ae41e4649b934ca495991b7852b855>

files or sc code only for testing I am not responsible for any viruses you give to anyone from these files or sc code [warn]

Why it's labelled as Android and Linux ? Is it an APK ? Is it an ELF ?

Why do you scan the zip file ? Unzip and then scan

DramaKing - November 26, 2024, 12:59 pm

It's a Windows executable with static object files. It gets two sandbox detections, so nice try. It's definitely confusing. It's also a stealer, not a keylogger. It's going to have a lot more detections in a few days, too, if it really isn't crypted.

I'm also seeing a TeamViewer log and Revo Uninstaller Pro.
