Thread: [UAC Bypass](#)

Peterjes - November 26, 2024, 8:22 am

I have an exe program in my hand now, and I need to add a function to bypass UAC. If you have relevant knowledge, please contact me. Thanks in advance

I will simply point you to this stupid long thread.

<https://hackforums.net/showthread.php?tid=6276451&highlight=i+wanna+bypass+uac>

Basically, if you don't have control of the antivirus, you'll need a bypass for which no signature exists.

I know that fodhelper has pretty much universal detections. I can't say much about the others, but I assume that it's about the same.

computerdefaults, fodhelper, and others like it do have detects - I believe they got more heavily flagged earlier this year, but have been flagged for a while by many.

This is a repo worth researching:
