Thread: [Advanced python scraper for automation + download](#)

Reporter - November 27, 2024, 11:24 am

I need a script that will run on my Linux server

The script will have two functions

Function 1:

I can run like

script.py -> Inserts a link to a specific page -> Script scrapes and downloads necessary data

Function 2:

automation.py -> Runs 24/7 on my server -> refreshes the website like every 5/10 min, and downloads any new data that gets pushed

The site doesn't really use any security or safety features,

Today I am manually right clicking -> Save .mp4, But I thought of automating instead of spending ~20 minutes every day doing it myself

Budget?

\$100 ? Maybe

Payment method:

PP preferred, account is verified longer than some people on this forum has been alive

DM me for full site info, task, site info and so on.

Thanks ?

I have replied to all DM's and Chats

AP29 - November 27, 2024, 12:31 pm

it can be done TG :CryptoWizard888

the automation can be done by corns job ???
okay

If you didn't get this done, let me know.

goldenspoon - November 28, 2024, 10:12 am

DMed you. Kindly check. :)

EvilMorti - November 28, 2024, 11:39 am

Can do this for you if you still need this.

Spam Assassin - November 29, 2024, 12:03 am

Can do this but I can only accept LTC/XMR atm so LMK if its possible.
