Thread: [FIRST THINGS TO DO AFTER INSTALLING KALI LINUX ?](#)

perkio - November 28, 2024, 11:48 pm

HEY THERE FORUM FAM , I AM ASKING WHAT ARE THE BEST THINGS TO DO AFTER INSTALLING KALI LINUX .

IF POSSIBLE PLEASE INCLUDE TIPS TO REMAIN ANONYMOUS AND ALSO MAYBE A FREE VPN IF POSSIBLE , IF NOT DONT MAKE FUN OF ME FOR ASKING THATS WHATS WRONG WITH FORUMS NOW A DAYS
! ANYWAYS HAPPY THANKSGIVING !

Bastille - November 29, 2024, 12:07 am

Why do you need to stay anonymous ?

Free VPN and anonymous are not compatible, they store logs that can identify you. For anonymity, Mullvad is the best choice as far as I know and it's 5€/5\$ per month.

If you installed Kali on a VM then : `sudo apt update && upgrade`
make a snapshot of your VM in case you break something, and you'll, as you seem to begin in this field

Then register on tryhackme and start learning there

Quote:THATS WHATS WRONG WITH FORUMS NOW A DAYS

What's wrong is people using caps lock to write messages, and it's pretty annoying

Glossy2k - November 29, 2024, 2:15 pm

I second @Bastille. I use Mullvad VPN on a lot of my servers where I run dockers for multiple uses of things that I do not internal network access to. If you are trying to host services and face them outside of your network for access, I would not recommend it. TryHackMe is a great way to get going and have a lot of online classes, or just go binge watch a YT playlist and just learn by trying.

"What are the best things to do after installing Kali Linux"

What is your objective? What do you want to accomplish?

lv\$1fxR - December 3, 2024, 1:11 pm

You're not supposed to 'install Kali Linux'. Use a real distribution instead, and use Kali Linux for pentesting.

\$!uo2H%gE# - December 6, 2024, 1:30 am

Just like Bastille said, update/upgrade. To be honest, if you're asking such a question, it might be better for you to learn how Linux works first and then move on.
