Thread: [Black Ops 6 Warzone Mastery Camo Finished](#)

I finally finished the Mastery Camo for Black Ops 6 Warzone..

This is very frustrating and difficult since some challenges are completely near impossible, but I got it done.

I now have:

- Dark Matter (Multiplayer)
- Nebula (Zombies)
- Abyss (Warzone)

All I have left is to eventually hit Level 1000 (Currently Prestige Master Level 250) and 100% Challenges for Multiplayer/Zombies.

You have no idea how broken my soul was during that entire time.

How the hell did you even get Warzone done that quick. That's gotta be so mind numbing lmfao. Congrats though! Abyss looks super sick imo & is my favorite camo in the entire game.

It was mind-numbing, you're right.
It was definitely the worst grind I've ever done.
