Thread: [Chili Protector Service - Protect your exe with CRYPT x64/x86/all .NET \[TG BOT\]](#)

n1k7 - December 3, 2024, 9:19 am

https://t.me/Chili_Protector_Bot Telegram Bot for securing your software (.exe) Main features:

Unique Encryption : Each file is uniquely encrypted with an 80-91% difference. Advanced AV

Evasion : Stay ahead with industry-leading runtime protection.

Universal Compatibility : Supports x32, x64, and all .NET versions, working seamlessly without dependencies.

Affordable Pricing : \$40 per build with bulk discounts.

Regular Updates : Weekly runtime updates for optimal efficiency.

High Speed : File protection is completed within seconds.

Affordable Pricing : \$40 per build, with automated payment support for BTC, ETH, LTC, and USDT (TRC20).

Regular Scanning and cleaning : AVCHECK results shared(issued daily at GMT+1).

Autostart Protection: Ensure the file runs on startup with termination resistance.

Decoy Execution: Add stealth by running a secondary file.

Custom Icon: Replace or copy icons from existing applications.

Anti-Analysis Detection: Prevent execution in monitored environments. Highlights: Automated Service : A fully streamlined system for hassle-free file protection.

User-Friendly : Extensive guides provided throughout the bot interface.

Languages : Currently supports English and Russian, with more languages planned.

AMSI : Built-in bypass included. Notice : This service will be automated successor to EchoCRYPT after few updates. EchoCRYPT, which is still available for users with heavy custom requirements, such as custom DLLs. Both services remain active and ready to meet your needs. Although at first, it will take moments to apply the updates but rest assured, there will be lots of functionality. We are in early stage with this service launch, there will news and updates on our channel provided below.

[*]T.O.S ([Click to View](#))

[*] The buyer is fully responsible for how they use this service. We are not liable for any misuse or consequences.

[*]By purchasing, you accept a no-refund policy unless certain conditions are unmet.

[*]Refunds are only guaranteed if we are unable to complete a deployment or meet agreed conditions.

[*]A re-fud will only be granted if the file is detected by AVCheck.net scans. If the file passes AVCheck.net's Windows Defender scan, no refund/re-fud will be provided under any circumstances.

[*]We reserve the right to decline service at our discretion.

Start a contract, contact and we can discuss more about it.

7 - January 4, 2025, 8:04 am

Interesting to see the result of some sales.
Posting to come back here at a later date.

kenomaskox - January 18, 2026, 11:52 am

Has anyone tried his startup so far?

yartse3 - May 4, 2026, 8:35 pm

(Jan 18, 2026 12:52 PM)kenomaskox Wrote: [\[CITE\]](#) Has anyone tried his startup so far?

Detected by WD at runtime, do not use this. Also, the file size comes out huge, make sure that you're fine with that. Started with ~300kb stub and ended up with a 12mb file. 12mb file and can't get past WD runtime.
