Thread: [BTC just reached 100K USD.](#)

jcole - December 4, 2024, 6:40 pm

This is a huge milestone for Bitcoin and other cryptos in general. Not sure what the future holds for this, but as Omni has always preached.. HOLD and STFU. This last month has been a great month for lots of portfolios combined and I'm excited to see what the near future holds for crypto and stocks alike. I hope you are HODLing. Don't miss out on these next four years.

Syndicate - December 4, 2024, 6:40 pm

LET'S GO BOYS, finally hit 100k. Congrats :)

jcole - December 4, 2024, 6:43 pm

(Dec 4, 2024 07:42 PM)Lowkey Wrote: [\[CITE\]](#) Next stop, BTC to \$1,000,000

I won't rest until I see it
Don't lose to much sleep over it.. It won't be an overnight thing, but this alone is a huge milestone for Bitcoin and the crypto ecosystem.

MOE - December 4, 2024, 6:45 pm

That \$2 Trillion market cap lookin mad fine.

jcole - December 4, 2024, 6:50 pm

Ofc, I was a non-believer 2 years ago. But wow, to see 100k is wild in our lifetimeStill lots of time in our lifetime to get in on crypto.

(Dec 4, 2024 07:45 PM)federali Wrote: [\[CITE\]](#) That \$2 Trillion market cap lookin mad fine.
Really excited for this new ATH because Bitcoin has been getting a lot of attention from the Trump administration and crypto in general. There was a proposal for legislation in July about a US strategic BTC reserve. This new milestone only strengthens the potential to get that bill passed.

'The Bitcoin Act of 2024 proposes a US Strategic Bitcoin Reserve to strengthen the dollar and maintain crypto leadership.

The proposal includes acquiring 1 million Bitcoins over five years and using Federal Reserve remittances to fund the program.'

Very true considering they would be owning 5% of all BTC on top of already owned BTC. Big move and would keep the crypto space bubbling

Zher0 - December 4, 2024, 7:10 pm

Let's gooo! We made history. From using Bitcoin in 2011 until now, we are the pioneers lol.

Marvelous - December 4, 2024, 7:14 pm

Whatever BTC can do ALTs can do better. I love seeing BTC go as high as possible cuz I will make bigger gains in ALTs

ep1capple - December 4, 2024, 7:17 pm

it's funny to me that \$100k is officially a bearish target now for bitcoin haha GGS

Chrome - December 4, 2024, 7:49 pm

Happy 100k day! Big gains!

My Computer - December 4, 2024, 8:59 pm

Great milestone indeed. BTC to the moon. ???

Toscan - December 4, 2024, 9:11 pm

Epic event! So glad I was there to witness it. So the 10 Million Bitcoin price doesn't seem to far fetch anymore. Next stop 1M!

Yin Yang - December 4, 2024, 9:26 pm

What a time to be alive

DrJackson - December 5, 2024, 12:44 am

Yes, Bitcoin reached a new all-time high today, hitting \$103k. This surge was driven by several key factors, including the appointment of Paul Atkins, a pro-crypto figure, as the next U.S. SEC Chair, boosting investor confidence. Additionally, BlackRock's iShares Bitcoin Trust ETF (IBIT) surpassed \$50 billion in assets under management, and Russian President Vladimir Putin expressed strong support for Bitcoin and digital assets, contributing to a bullish market sentiment. BUCKLE UP BOYS!

StuffSneak - December 5, 2024, 12:54 am

Its already almost 103K so I guess the 100K wall wasn't as big as we thought initially.

campusminger - December 5, 2024, 2:00 am

ah man this is good day.

??? ? ??? ??? - December 5, 2024, 2:57 am

(Dec 5, 2024 01:54 AM)StuffSneak Wrote: [\[CITE\]](#) Its already almost 103K so I guess the 100K wall wasn't as big as we thought initially.

If you think about it the wall is 100k, so once the wall is down there isnt any defenses for a short

while. Its like breaching helms deep if you want it in a LOTR reference.

Its the same reason why its possible for BTC to jump to 150k quickly because if there are not any major sellers then the order books just keeps getting cleaned on the sell side.

Mewtwo - December 5, 2024, 3:06 am

I'm sure January 20th will be the day bitcoin will go up another \$20-40k.

UltraexTrader - December 5, 2024, 3:13 am

Damn bro, I remember the days where it was just a few hundred \$.
This is incredible moment for everyone :)

RangoWorld - December 5, 2024, 3:50 am

Time to dance! Literally I meant it!

UltraexTrader - December 5, 2024, 7:22 am

(Dec 5, 2024 04:56 AM)Animal Wrote: [\[CITE\]](#) If only you'd bought a dozen BTC at that time, you wouldn't be here talking about how it was just a few hundred.

I bought a lot of it and gambled millions of dollars on various of Crypto casinos for the past 8 years :)

Imagine8 - December 5, 2024, 8:08 am

Welp, this is great news. Throwback to the days of selling mid-tier CS:GO knives for 1-3 BTC, if only little 15-year-old me never exchanged to PayPal ay

Omniscient - December 5, 2024, 9:50 am

Huge day. I'm sure many of us have apps that alerted us to the moment.

\$100k is \$2T cap. I think the next massive milestone is a \$10T cap or \$500k BTC price. At the \$10T cap that's enough of overall value that high end corporations would likely start figuring out how to use Bitcoin in settlements and store of value. We can't get to \$10T cap without corporate world and Wall Street.

Once that adaption starts to occur the \$1m BTC mark will come in 5-8 years and that's when it will be obvious to everyone exactly what Bitcoin is, which is Global Reserve Currency, controlled by none, trusted by all. btw...that's perfect motto...

Bitcoin, controlled by none, trusted by all.

Hmm...like that?

Chrome - December 5, 2024, 8:23 pm

This is the most it's fluctuated that I know of. Flip flopping everywhere.

Braco22 - December 6, 2024, 12:40 am

The first flash crash during this bullrun, with many like these to come. Blink it and you'll miss buying at the lows. 104k to 90k is a nice correction and it goes to show that the 14k is back to 6k drop only. This buying pressure only suggests around 90k that we have a MASSIVE support level.

G-EZE - December 6, 2024, 6:15 pm

Agree with Omni here , best to not check ur portfolio every day or the anxiety will get the best of u and panic sell when the market is down a bit . I think ETH is a great buy right now as it has lagged behind BTCs performance this last month or 2 . I think we will see some nice gains with ETH over

the coming weeks / months , maybe a new ath soon.

Rubysplash - December 6, 2024, 8:59 pm

it's crazy 2 years ago it was 30k

GruntStyl - December 7, 2024, 9:38 am

Dont you know bitcoin cycles?

In 2026, btc will most likley be at under 100k and in a long bear market.

That no one controlls bitcoin it self doesnt matter.

The bank can just print usd and buy bitcoin with it, but bitcoin enthusiasts dont care about that as long the price of btc goes up.

Different landscape now. We have never in our history had a president being in support of crypto currency (BTC in specific). Followed by him lining up office with crypto supporters.

No one being able to control Bitcoin is one of it's core values. It does matter.

Banks don't print money. Only the US BEP can print money.

There is many reasons it has gone up substantially over the last 15 years of it's existence.

People said that last cycle also, but they were wrong.

Doesnt matter that no one can print bitcoin.
Imagine USA printing money and put it all in like Ferrari cars, who will then controll the market?
I USA invest heavily in btc and would own like 30% of all bitcoin, that would be a hughe red flag.
Micro strategy have like a few % of the total market cap.
You clearly dont understand economy.
The one that owns the most an asset have also a lot of controll of the market.

Nothing prevents USA from printing 2 trillion usd and put it all in btc.

People said what last cycle?

Microstrategy owns 1.7% of BTC.

The US prints that amount of money for less useful things. Putting it into BTC wouldn't be a bad thing. Unless you're against it for whatever reason.

I don't understand economy? Coming from the the person that thought Banks print money. Alrighty.

People said that since we had people like elon musik and Michael saylor, the price wouldnt go down much beccause they would never sell.

So explain to me what happen if someone owns like 10-30% of an asset?

We have already seen what happen when a country own to much of the miners and those miners go down.

If USA owned 10-30% if all bitcoin, they could manipulate the price very much, you dont understand that?
