Terms of Service for Anubis HTTP Loader

Spoiler ([Click to View](#))

Effective Date: 2/5/25

1. Anubis HTTP Loader: ("the Software") is a tool developed solely for professional penetration testers and cybersecurity researchers. This Software is intended for lawful security assessments, authorized testing, and educational purposes only.

-By downloading, accessing, or using Anubis HTTP Loader, you agree to comply with these Terms of Service ("TOS"). If you do not agree with these terms, you must not use this Software.

2. Authorized Use: The Software is strictly limited to use in the following scenarios:

- Testing and security assessments on virtual test environments you own.
- Engaging in penetration testing activities for organizations that have signed a legal waiver authorizing such tests.
- Educational research conducted within the bounds of applicable laws.
- Any use of the Software beyond the scope outlined above is strictly prohibited.

3. Legal Compliance:

-Users of Anubis HTTP Loader must ensure that their activities comply with all applicable local, national, and international laws and regulations. It is the sole responsibility of the user to obtain explicit legal authorization before using the Software in a penetration testing or security assessment scenario.

-Unauthorized use, including but not limited to unauthorized access to computer systems, networks, or data, is strictly prohibited and may constitute a criminal offense.

4. Disclaimer of Liability:

-Py_Dev and its developers provide Anubis HTTP Loader "as is" without warranties or guarantees of any kind, express or implied.

-Py_Dev and its developers assume no responsibility for any damages, direct or indirect, arising from the use or misuse of the Software.

-The user bears full responsibility for any legal or ethical consequences resulting from their actions.

-Py_Dev and its developers disclaim all liability for any harm caused by the use of this Software.

5. Restrictions on Distribution and Modification

-The Software may not be resold, repackaged, or distributed without explicit permission from Py_Dev.

-Users are prohibited from modifying or reverse-engineering the Software for unlawful purposes.

6. Termination of Use:

-Py_Dev reserves the right to terminate access to the Software or restrict its distribution at any time without notice, should a user be found violating these Terms of Service.

7. Acknowledgment of Responsibility: By using Anubis HTTP Loader, you acknowledge that;

-You have read and understood this Terms of Service agreement.

-You will only use the Software in a lawful and ethical manner.

-You accept full legal and ethical responsibility for your use of the Software.

8. Changes to Terms:

-Py_Dev reserves the right to modify these Terms of Service at any time. Users are responsible for reviewing the terms periodically for updates

9: Absolutely NO REFUNDS, ALL SALES ARE FINAL!

VOUCHES:

(Dec 6, 2024 03:19 PM)TT0xicc Wrote: [\[CITE\]](#) Received a VC of Py_Dev and I must say that it is one of the best Loaders i have tried so far and im really surprised.

Clean Panel, nice Dashboard. The Anti Kill is insane i must say (have fun killing it)

Recommended for sure.

Take your shot with this one.

Only positive experience with Py_Dev so far and i bet it will continue like that, nice dude ^^
(Dec 8, 2024 12:57 PM)Caboose Wrote: [\[CITE\]](#) i received a vouch copy of Anubis from PY. I absolutely love it, The UI is clean, the anti-kill is fucking nuts, and the support he provides is unmatched. This is one of, if not my most favorite loader i've used. I highly recommend Py and his products.

(Dec 17, 2024 04:50 PM)Infinity. Wrote: [\[CITE\]](#) Vouch for PyDev and his product, I am one of the support guy and setting the product up is a very easy and smooth.

I will help to test and develop the product!

(Jan 1, 2025 05:10 PM)CompulsivePurchaser Wrote: [\[CITE\]](#) My Runtime Scan with my crypt, Startup and WindowsExclusions on : <https://scanner.to/result/eFEfDCjauKG8>

The Loader is very stealthy and you can customize the ping intervals

The Panel is beautiful and packed with features that really make your live easy, I'm truly happy that I decided to buy this product, trust me

I know what it means to spend money and feel like you threw it away, this is the complete opposite.

Seller adapts to your needs and this loader is really complete. Not only does it come with a lot of features but [Py_Dev](#) really takes suggestions into consideration, he knows what he is doing and this product is probably not going to be lifetime at this price in the future, it's just too good for this price. Do yourself a favor and buy it while you can it's heavily underpriced.

Thank you brother!

With Anti-kill feature added on the runtime of the raw payload is higher. If you have a crypter and can fud the payload I would recommend to add this feature on. It turns the payload critical and if process is terminated, it will blue screen of death. It will return on start up as that function happens prior.

This is scan of payload runtime with the anti-kill activated:

Interested gonna get some money

tripplex - December 14, 2024, 6:31 am

Can you send me your TG

brizy007 - December 14, 2024, 11:36 pm

if you do not want to regret wasting your money i say avoid this tool.
the panel is same as litehttp no upgrades to it most task eg download and execute are outdated.
if you stub is not exe it will not download and execute.
If you pay you will not get a refund is better you stay away from this software the better for you.
Is the worst loader i have even seen. complete shit of a project.

Muifar - December 15, 2024, 7:34 am

ok then open a dispute?

Harald - December 15, 2024, 1:46 pm

(Dec 15, 2024 02:24 PM)brizy007 Wrote: [\[CITE\]](#) you toll is not working. You provided a tool, Yes did it work NOPE

I would like to see you fully substantiate your claim by initiating a proper contract dispute, as is the appropriate course of action, rather than resorting to sales-bashing 'py_dev.' Please provide the necessary evidence to support your case. If your claim holds merit, I trust the site administrators will handle the matter accordingly.

That said, I believe 'py_dev' has demonstrated consistent support for his product, and I am genuinely interested in seeing how this dispute unfolds. However, I have a feeling that 'py_dev' will successfully defend himself and demonstrate why this claim lacks validity.

To be clear, this is neither an endorsement nor a vouch for 'py_dev.' It is simply my perspective on the matter.

int main() - December 16, 2024, 2:58 pm

honestly going from a rough mockup of a bot to this and in c# is off putting, definitely not worth the hype also HIGHLY doubt anything in the backend code is better than whats on github of litehttp, just a new frontend

Py_Dev - December 16, 2024, 3:13 pm

(Dec 16, 2024 03:58 PM)int main() Wrote: [\[CITE\]](#) honestly going from a rough mockup of a bot to this and in c# is off putting, definitely not worth the hype also HIGHLY doubt anything in the backend code is better than whats on github of litehttp, just a new frontend

The front end is the only part that resembles lite-http. All of this has been added and reworked.

- 4.8 Framework.
- Botkiller: Scans processes running, startup, reg keys.
- Download & Execute
- Update
- Startup
- Asmi Bypass
- File Hide
- Startup persistence
- Random Delays added for obfuscation.
- Usb spread
- One drive spread
- iCloud spread
- Google cloud spread
- Dropbox spread
- Anti-Kill (Add on just ask)

Bot Update 1.0.6

Download and execute now handles | .exe, .bat, .cmd, .ps1, .vbs, .pdf

If there is something someone wants added, please just ask me. Dont be a douche about it... and I will handle all requests.

Infinity. - December 17, 2024, 3:50 pm

is this fud if not which cryptor is compatible?

Py_Dev - December 18, 2024, 6:45 am

(Dec 18, 2024 07:36 AM)pure_voltage Wrote: [\[CITE\]](#) is this fud if not which cryptor is compatible?

It is not FUD. Most crypter should work that use injection or side loading. I am trying to reach out to crypter owners here on hf for compatibility testing.

SIM-2698200 - December 19, 2024, 4:27 am

well a dumb question, can anyone let me know what mainly HTTP differ this from other bots? What it exactly mean by HTTP, is it mean that others do not work with accessing through HTTP?

Py_Dev - December 19, 2024, 6:36 am

(Dec 19, 2024 05:27 AM)Meoww Wrote: [\[CITE\]](#) well a dumb question, can anyone let me know what mainly HTTP differ this from other bots? What it exactly mean by HTTP, is it mean that others do not work with accessing through HTTP?

The cnc panel uses HTTP protocol to communicate with the client or a "bot"

So the panel is accessed in your browser and the bot will ping your web server to receive instruction from the http panel.

Other bots like rats and so forth are another type of animal.

SIM-2698200 - December 20, 2024, 7:09 am

(Dec 19, 2024 07:36 AM)Py_Dev Wrote: [\[CITE\]](#) The cnc panel uses HTTP protocol to communicate with the client or a "bot"

Other bots too share the same similarities, they too can be accessed and/or with client can be interacted through an http protocol or browser. Correct me if I am wrong?

Py_Dev - December 20, 2024, 7:19 am

(Dec 20, 2024 08:09 AM)Meoww Wrote: [\[CITE\]](#) Other bots too share the same similarities, they too can be accessed and/or with client can be interacted through an http protocol or browser. Correct me if I am wrong?

If it is a HTTP bot, then yes. Bot likes Amadey, Smoke Loader, Beta bot, Andromeda are all considered "http" loaders. It is harder to packet trace because they connect port 80. same as a web browser. You keep saying "other bots" which one's are you speaking off exactly? It's hard to answer your question because the term "bots" are very vague.

github67 - December 20, 2024, 1:36 pm

1.How much does VPS cost for this botnet, monthly/yearly? It's look good.

2 Do you have a plan to keep alive this botnet and update/manage it for long time?

Py_Dev - December 20, 2024, 1:40 pm

The bots you stated is what i am referring to, last question before i consider buying this, what OS are supportable with this, is this FUD? if not, can it be made, is the price negotiable?

Py_Dev - December 21, 2024, 8:03 am

(Dec 21, 2024 05:25 AM)Meoww Wrote: [\[CITE\]](#) The bots you stated is what i am referring to, last question before i consider buying this, what OS are supportable with this, is this FUD? if not, can it be made, is the price negotiable?

Its on windows framework 4.8. It is not FUD. Right now its 10/40 on Kleen scan. It can be encrypted by most crypters. The price is not negotiable. Its \$250 and you install the panel, or \$350 for my staff to install it on your vps. We have a support group on telegram.

SimbaService - December 29, 2024, 11:23 am

Great guy and great product! Support is super, helped to set up and install the panel. The coder added the required functionality very quickly. Namely loading my side dll crypt in a zip. Definitely recommend to buy!!!

I will help to test and develop the product!

Py_Dev - January 6, 2025, 8:49 am

New stub build. Better performance, persistence, bot killer updated. Bypasses windows defender. 7/40 on kleen scan!

https://kleenscan.com/scan_result/c4fd845e9ac253d93740538183be6e621c16b72bf1519c723769e7

[e063a8c040](#)

New stub size: 37kb!!

Bot version 1.0.7 out now!!

latencyx - January 15, 2025, 1:24 pm

Looks like a good product, good luck with sales

Py_Dev - January 20, 2025, 1:43 pm

-Bot Update-

Bot version 1.0.8 now released. It now had better encryption communication. It has updated botkiller. It now reports to panel with gpu, cpu, antivirus which is displayed on details.php. Clean scan is now 6/40. I also have made a encryption for an extra 20\$ fee on compile that lowers it to 3/40.

-Panel updates-

Details.php now reports the gpu,cpu, antivirus.

Config.php: Updated encryption and decryption algorithms

Adfusdks1 - January 27, 2025, 6:26 pm

(Dec 6, 2024 09:39 AM)Py_Dev Wrote: [\[CITE\]](#) Anubis HTTP Loader.

Information, I have made a loader based off of "LiteHTTP" I wanted to update the bot and make it cheap for anyone looking for a solid botnet loader. This has many advanced features (See below) I have personally tested this for a few months and its a great tool.

Features

- 4.8 Framework.
- Botkiller: Scans processes running, startup, reg keys.
- Download & Execute
- Update
- Uninstall
- Startup
- Asmi Bypass
- File Hide
- Startup persistence
- Random Delays added for obfuscation.
- Visit Webpage | Hidden or not |
- Usb spread
- One drive spread
- iCloud spread
- Google cloud spread
- Dropbox spread
- Anti-Kill (Add on just ask)

File Size 50kb

Price

Purchase comes with panel and 1 build.

I do not host or help with setup. Its simple to install on your vps. (I WILL PROVIDE A SIMPLE TUTORIAL!)

Setup fee \$100. Provide suppor staff with VPS info and we will install it!

Free updates for life of this project.

Current bot version: 1.0.5

First Purchase of tool/bot:

\$250 with LIFETIME Panel Updates | No Setup

\$350 with LIFETIME Panel Updates | Setup support

After first purchase:

\$40 Rebuild | Updated bot build.

vouch copies 2/2

(Feb 9, 2025 02:58 PM)NINJA.b0x Wrote: [\[CITE\]](#) yes how much total cost ?
2,000 USD. I wouldn't take anything less.

Astro.x - February 9, 2025, 8:54 pm

(Feb 9, 2025 06:08 PM)Py_Dev Wrote: [\[CITE\]](#) 2,000 USD. I wouldn't take anything less.
Lowballing the potential especially considering going rates of source code. Definitely should be more towards 4-5,000 USD, granted its not native tho. GLWS, looks promising

Py_Dev - February 10, 2025, 4:13 pm

(Feb 9, 2025 09:54 PM)Astro.x Wrote: [\[CITE\]](#) Lowballing the potential especially considering going rates of source code. Definitely should be more towards 4-5,000 USD, granted its not native tho. GLWS, looks promising
yeah idk how to price stuff like that, i didnt want to seem greedy lol

Py_Dev - February 17, 2025, 7:23 am

Added Multiple "plug-ins" This are separate application you download and execute on your clients. This is possible because the original stub creates a copy of itself in a hidden folder with a install.txt This allows the plugins to know where to work from.

Windows Exclusions: Auto Elevate and adds windows exclusion and Hkey persistence to the copied file.

Hkey: Just sets the Hkey to the copied file.

Healer: Ensures the Stub is always running, restarts from the copied file if it is not.

Bot 1.0.10 in development, added better persistence and a clipper.

hoangdoan - March 24, 2025, 2:09 am

Dude, So this Loader build is FUD right? So I won't need any crypter service?

And second thing. I really want to buy it but I don't have enough money right now, Do you have a discount code for new?

thank you

Do I need crypter service if use your loader?

Py_Dev - March 27, 2025, 3:11 pm

Always encrypt my shit tf. Yeah my loader is 2/40 scantime doesn't mean I want you all sucking milk out my code.

You should encrypt his file no matter what. Keeps his/the stub for FUD longer and will protect from reverse engineering your data inside the stub.

Don't be ridiculous. Always crypt malware. This is why devs have to work so hard on maintaining a

low AV score and why botnet masters end up in jail...

Loader looks good. GLWS.

Hasn't responded for almost a week now. Loder is not working for me at the moment. Waiting for support
