Recently getting back into e-whoring, looking at creating a discord server, or a telegram with a group of equally as motivated individuals like myself.

PM me or drop your discord and I'll get you added.

Those active groups eventually died down honestly. Maybe the OFM one running by source code is useful.

Probably I can help with this if you have concurrent group. I can scrape every group for users (ID, username, first and last name, phone), send them to your channel or mass dm every member of a group. So it would be faster
