Thread: [Short Term Correction to 70k Imminent?](#)

Skidsuper - December 8, 2024, 5:29 pm

RSI, STOCH RSI, and the fact that price is hovering way above moving average indicates a strong possibility of a short term correction to 70k levels.

Arrows and charts never lie!

GruntStyl - December 8, 2024, 6:19 pm

Can't tell. Everyone seems excited still. Might take more time of fluctuating between 100k-98k?

Beaks - December 8, 2024, 6:46 pm

I hope you are right. I always DCA, but I would buy a lot more than normal if it dropped that much.

pumpfun - December 8, 2024, 11:26 pm

I don't believe there will be correction under 85-90k

I think this "bell curve" chart is more likely.

Buy, DCA, HODL and most of all, don't panic.

hahahahhahahahahahahahahahha.

Yeah my dumb ass sold 1.4~ btc at 73k and im waiting for an 80k dip to buy back in. I sold btc for doge position so I cant complain, now riding the ETH wave but goddamn.

..... if it doesnt come back in I'll probably go long on ETH and cry into my pillow at night.

d3t0x - December 10, 2024, 5:28 am

Awhhh :(was my bell curve chart removed or did the link just break. I thought it was a very accurate indicator lol :)

I wouldn't be surprised if we see prices around 70-75k sometime in the future. There is major support there on the chart, and if we see a down turn, I would expect prices to test that area.

For price to go to 70k someone has to sell their btc at 70k. The question is who will sell their btc at 70k.
