EDIT:

I can vouch here.
The encryption is good.
Persistence is good.
FUD on kleenscan and a few others.
Happy with my buy. It was quick and he resolved an issue quickly.

I recommend.

Thanks

Not sales trashing but posting for awareness.

<https://hackforums.net/showthread.php?tid=6261188>

OP has 2 b-ratings, one is for a purchase of bytes (so not relevant to this service offering) and the other is for this crypter.. by a non upgraded user without being linked to this thread. That user joined

today too. How very odd...

OP themselves joined 1 month ago and is a L33t user.

With all this in mind, people should use a 3rd party middleman and deal with caution.

Yes. This guy is obviously known ban evading scammer.

He created this account just to vouch for himself here

<https://hackforums.net/showthread.php?tid=6284323&page=2>

He waited few days and now trying to scam with it.
Same scheme and practices ie. fake vouches from fresh account, same poorly made thread design.
Not even worth to list all other similarities.

He will be smacked again, just a matter of time.

A couple of facts:

1. Penny Trate account is 12 days old
2. His first post was a vouch for a ban evading scammer
<https://hackforums.net/showthread.php?tid=6284323&pid=62587816#pid62587816>
3. He has 2 b-ratings, one is for a purchase of bytes (so not relevant to this service offering) and the other is for crypter, by a non upgraded 2 days old account.
4. His services(rat/botnet setup and crypting) are the most common scamming schemes
<https://hackforums.net/showthread.php?tid=6261188>

With that being said, we all know what is going on here.

By the end of this year i will update the thread with recent patterns.
He got many accounts banned in last few weeks, yet still trying. So poor.

Amazing that you want 600\$, but you use a FREE antivirus scanner, you can't spend 100\$ on avcheck?
