Thread: [Best beginner programming language](#)

Dillermanse - December 12, 2024, 11:06 am

What beginner programming language is best for making malware specifically rat.

SIM-5552122 - December 12, 2024, 11:11 am

One good language for complete beginners is Python. It's more of a scripting language, but it's easy to get started with coding. However, since you are specifically looking for a language for malware development, I would suggest starting with C#. While it might not be the best, it's easier to learn. If you want to go deeper, the best languages for malware development are lower level ones like C++, C, and Assembly (asm).

RootRXXT - December 12, 2024, 11:16 am

yea man , python is key, heaps of tools and apps to help you start learning it!

Dillermanse - December 12, 2024, 11:30 am

Okay thank you very much
