Thread: [How do I transfer cryptocurrencies anonymously?](#)

SIM-5411207 - December 12, 2024, 3:23 pm

I have ZEPHYR coins earned from CPU Mining. What should I pay attention to when transferring them to an exchange where I can withdraw money? Currently, these coins are held in a non-KYC exchange, but in order to withdraw the money, I must send them to an exchange that requires KYC, such as Binance. Normally I convert the coin into Monero XMR and send it to a new Exodus wallet, then I swap the coin into BTC and send it to Binance, but this swap takes a 3% fee and I'm not sure this transaction is anonymous enough. Is this an anonymous enough transaction? Is there another way with less fee?

<https://www.coingecko.com/en/coins/zephyr-protocol>

Looks like MexC has a trading pair.
