Thanks guys :)

It is indeed a very simple guide to follow. I think a lot of people will understand how nice this solution is. I don't know if many people know about this one, but it's very reliable.

For others reading:

- The guide shows you where to sign up
- How to set up your account
- Finish your payment / payout settings
- Create your first invoice
- Complete your first swap

:) Glad you found it useful! It's an undiscovered gem around here I think. Hoping more people see the 100 byte price and buy it ~ definitely intending this to be more well known, it's a sweet method with a ton of cryptos supported... People can start swapping within minutes.

Seems like a straightforward guide, will test out the method very soon. For prospective buyers, it's clearly written and includes all the links and screenshots needed to hold your hand through the entire process.

I'm glad I bought it!
