Thread: [\\$XLA Whale activity alert 5% of circulation on exchanges](#)

PappyProxy - December 17, 2024, 1:51 pm

Small alert for altcoin nerds

\$XLA with mining and staking potential in the future has nearly 5% of the circulating supply for sale right now!

offline hard wallet or mobile offline wallet activity.

driving the price to the sky!

1 billion which is 5% of 15 billion total would be nearly 50k USD in pump little nerds.

The current market cap: 600k. Expecting double digit gains :D lock and load.

Lol, another network that claims it's secured by mining from your cell phone. When will people realize this is a gimmick?

Quote:1 billion which is 5% of 15 billion I guess when this is the caliber that we're working with... not anytime soon...
