Thread: [\[Free\]javascript reverse_shell | without port forward |](#)

darkosel - December 19, 2024, 1:31 pm

[github.com/Darksel0/jsreverseshell](#)

Start command: python server.py on your machine
replace your ipv4 in reverse_shell.js file
execute reverse_shell.js in target machine ?

I'm definitely not seeing how this is supposed to connect to a server behind PAT.

Android can only run Android apps. It cannot execute .js files by themselves. Not unless you run it with another app. You've been trying to infect Android devices for long enough to know that there is no easy way to take over a device.

will give this a try

sammy1s - December 28, 2024, 10:24 am

thanks for sharing! works great
