I believe this is for a purchase of the plan. I recently paid for a similar service, and received 13 months of Xbox ultimate game pass.

Do you have a limited supply of these, or plenty to go around?

Depending on which I might be interested in a bulk purchase for multiple people. As long as the accounts don't have to be logged into by you for code redemption, as some of them are for friends who won't want to give out their login info.
