Thread: [Transaction stuck on a node](#)

InDeepshit - December 21, 2024, 12:12 pm

Hey.

Not sure if this is allow on this thread.

Anyway i have a transaction that is being stopped on a node and wont get back unless i pay them, is there any chance of forcing it into my wallet ? The transaction has started but has been stopped by them, im not sure if its a scam or not.

All help appreciated.

Crypto is meant to be permissionless. Sounds like a scam.

This is very fishy sounding. Can you independently verify that a transaction is processing?

I'm not gonna lie, someone else told me that, i do not have the knowledge to find out my self.

What coin is it? Def sounds like a scam, i'd be wary of paying anyone.

Send me a PM with transaction, I can check it out for ya.
Sounds like a scam though.
