Thread: [How can I make \\$5-10/Day Passively online ?](#)

JNath - December 21, 2024, 8:10 pm

Hello everyone, I work with adult niche and get so much time left with me after working. I work 2 hours max in a day and left with 22 hours in a day which I spend mostly sleeping or watching reels.

Is there anything I can setup with some investment or less work which can make \$5-10/day passively. I don't care how much time it takes setting it up because I have lot of time on my hands.

Money- - December 21, 2024, 9:56 pm

Instead of setup. Why not look into trading? Since you have time right? Trading only takes 1 or 2 mins to look at oppurnities.

You don't need to work on it 24 hours. Just check and then go do other stuff, if you saw a chance then trade it. You can earn already like \$50-\$100 per trade depending on your budget.

But learning it takes time and all but once u get used to it. Its minimal work.

No need to be a professional trader. Be a part time casual trader is also enough to give you passive income without so much work.

Same goes for sports betting? Just bet and wake up to results. That's pretty much how I do now.

But remember , it takes time to learn all this but the setup is very easy in the long run.

I am by no means a expert sport fan or whatever. I get into sport betting because of money that's it and i learn the sport and how to bet eventually but took me some time ofcus.

Takes a little investment but purchase digital codes like Xbox live on sites very cheap. Setup with 3DSellers and auto sell on eBay.

How much investment do you think I need to make \$10 from trading everyday?

hmmm \$10 for trading ain't cut out. Maybe \$1000 is enough.

But for sports bettng for \$10 you can win up to \$50-\$100 or even more but you need to win and you to assert the risk.

For me I prefer sports betting much easier compared to trading.

But I can't say much u need to try urself. Ofcus you will lose money if you are willing to learn all this. Its worth it.

Since u got so much time why not take on a new adventure.

I dint learn to bet overnight btw. Took me more than that but now is easy money for me. I win pretty much win every match btw.

Even if I lose I only lose 1 -2 times but u already profit 5-20 times so no big deal.

The sport I bet is on UFC btw. Since its only 2 fighters. You just need to asses 2 fighters only. Remember dn't be greedy , but u gotta watch the sport at least to get an idea. Once you got used to it , you can just bet based on what fighter u know and wake up to results that's it.
