Yes, just go to the official Shopify website, enter your details and your card. They will charge you \$1 or a little more and you will have 3 months of subscription.

This is such a great deal! 3 months of Shopify for free is perfect if you want to start an online store without spending money upfront. It's super easy to use, with nice templates and tools to help you sell. I recently used a GMA (dealsandstealstoday.com/) to get started with an online product, and it worked out great! Anyone else trying Shopify?
