Thread: [Selling gmail checker \[0% ban rate\] \[tg bot\]](#)

Hey everyone I'm selling access to my gmail checker with telegram bot for:

20\$ day

90\$ week

230\$ month

Gmail checker comes with telegram bot access, it is pixel based because I use it for checking new accounts I create and I don't want them being flagged later on.

Unlike checkers that use headless browsers it doesn't get acccs flagged nor risk banning them.

what do you mean by this post? what is the limit? do we need proxy? you say 0% ban rate? at what rate of checking we get 0% ban rate?
