Thread: [Any Good Memecoins Strategy for \\$20?](#)

Burak82022 - December 23, 2024, 6:57 am

hello im already forex trader so i just want to know what is the good signals if this coin is going like 2x or 3x something like this

Money- - December 23, 2024, 7:08 am

What you trade as a forex trader? Gold? USD?

Omniscient - December 24, 2024, 1:58 pm

So you're just wanting to trade \$20 worth and then do a 2-3x? You may as well gamble.

As far as I am concerned dumping into a memecoin with any amount of money is ridiculous.

Spoiler [\(Click to View\)](#)until a major ceo and now part of the presidential cabinet comes out and picks one up

\$KOLIN

AI agent 'meme'

search for it on phantom wallet, you'll be able to swap solana for it.

6 mil market cap, all other memes in this space are 300m to 700m market cap once the agent develops

I can see this minimum 10x max 100x just buy and sell in alt season

it is dumb for sure. but if he wants to throw \$20 away its more fun than gambling. longer too. you bet it away and its gone forever in a couple mins.

you buy a meme coin and get to watch it every day. I dumped \$10-20 a piece in hundreds of these 10-50m mkt cap memes. I couldn't tell you how many times I've woken up to a \$20 bet grown to \$100 or \$200. All I do is watch which coins are graduating from pump.fun to raydium and snipe all the AI plays.

its profitable, but you'll have to be smart to get an edge. \$20 into a "lazy monke" coin is going to get rugged almost guaranteed.

the going from 80k mkt cap to 5m is much harder to guess/find than one getting from 5m to 50m
