Prosecutors believe the former teacher had as many as 21 victims between the ages of 12 and 17, investigators said

"They were befriended by their former teacher, McCommon, who began playing video games with them."

The statement added McCommon told one victim he would "regret" going to the authorities, police said in a statement.

DNA showed a 12 year old to be the father of her baby. She is ordered to have no contact with her baby.

Wow, not common to hear of the female being on the aggressive side. At least not too many cases of this in the media.

Meh. It's definitely less common but its happened plenty of times. People just don't think it's as of a big deal if it's teenage boys and particularly if the woman is considered attractive.

It's great to see a man actually being honest about this. I see so many men online who when they read about a statistic saying that 90% of violent crime and sexual assault is done by men they will always say "those female teachers though," but what percent of sexual crime is female teachers? Like 0.005% lol

All that being said psychopaths are estimated to be 1 or 2% of the population and they are men and

women in equal numbers and the main reason a woman would go after a 12 year old must be some type of power game and liking to defy societies rules and fuck with people.

It had to be some sort of twisted power and control game because I honestly don't see what she'd get out of this sexually in reality.

Yes and I've realised after seeing a lot of stories in the news and on true crime channels over the years that a lot of the men that commit pedophilia are in fact NOT especially attracted to children with a fetish for children, but in fact enjoy all kinds of sex but they have Anti Social Personality disorder and so it's just a method of expressing their sadism and causing pain and horror and committing the worst crimes they can against society. Sigh.
