Thread: [We receive \\$100 per day on the 1WIN affiliate program](#)

greendex - December 25, 2024, 12:25 pm

Today I will tell you about one great earnings on the 1WIN affiliate program.

Our earnings will be based on attracting players to the bookmaker's office, luring the player to place bets, play at the casino and bring profit to us and the company.

We will work according to the RevShare system - 50% of the company's profit goes to us. This is a very large percentage, for 50% of the profit you get a fully configured casino with the best envelope, other affiliate programs give 20-30%, and it can also be increased.

If the player loses, 50% of the loss is credited, if he wins, the balance goes down by 50% of the winnings. Don't worry, sooner or later 95% of the players drain all the money.

Let's move on to the essence of earnings.

- 1) We register in the affiliate program: [1w.run/?p=d94b](#)
- 2) Go to the "Links" section and create our referral link.
- 3) Now we need people to register using the link in the bookmaker's office and place bets.
- 4) We will receive 50% of the money lost to the invited person (If a person loses 100\$, 50\$ will be credited to you).
- 5) You can also create promo codes in the PR tools section, and those who enter it will also become your referral.
- 6) Those who follow your link will receive a bonus to their balance, which you can't win back, but this fact can be used as a reason to follow your referral.

"Method 1. We gain confidence in a person" ([Click to View](#))

We are looking for people in telegram chats, everywhere! Even on Viber and WhatsApp, the people there are even dumber.

And what? 50,000 clients with proper processing.

You can deceive people, write in the chat that you are selling deals, reinforced concrete bets, mega bonuses

and everything is cool. There are a lot of people who drop winning bets in the chat. You can discount random bets if you get knocked up a couple of times, people will have confidence, if not, then it doesn't really matter. People write to them themselves, "give me a bet." Of course, their condition is to register via a referral link, 500 rubles at once, or 50% of the winnings (a random bet is given, if a person wins, then he gets 50%, if not, then he does not lose anything, you can drive both by refka and for 50%, then he will pay for the winning bet, and in as a result, everything will lose and it will also drip onto the ref. I condemn this, but why not, I don't really feel sorry for stupid people)

You can do what I do, write to people, get to know them, and slowly lure them to 1win, saying what cool bonuses there are, instant withdrawal, the best support, and in general everything is mega cool, which is not worth it with fonbet.

We are turning on social engineering, after all, the social engineering forum! In fact, it requires very good social engineering skills, and people there are extremely uncommunicative and angry.

"Method 2. Telegram inviting" ([Click to View](#))

Creating a chat in telegram. It would be advisable to take the old chat altogether, they are less likely to be banned.

Of course, we need to try to design it, to post it on the blog.

You can create a chat where people can chat, or you can create a private chat where you can't

write messages, but your messages or bot messages will bring up the chat (I even have a bot to send a message at a certain random time, I can send it to anyone)

If you create an active chat in which you can actually communicate, you can secure a good advertising post on the internet, people will communicate, trust the chat and follow your referral link. I did a private chat, invited 500 people, and received a \$40 deposit. Not much, but I lost my \$20.

You can invite with software, you can order, or you can use pens. Everything is clear with the software and the order, the handles are a little more difficult, I managed to invite a maximum of 100 people per day.

We buy a telegram account, I take it on the market.

Download the Telegraph app (available in Google Play, I don't know about the app store)

Log in to your account. For this method of invitation, you do not need to have a password on your account.

We enter the chat - click on the icon - three dots - search for participants

We select about 50-60 people, click on 1 checkmark, select your chat. That's it, people are interested. You can try to sign up with the same account tomorrow. After 100 people, I couldn't invite any more, but my friends could invite another 100 people to my chat. In general, experiment.

You can also use accounts for the 4th method.

"Method 3. Purchase of telegram ads" ([Click to View](#))

We are looking for telegram channels with an adequate advertising price in relation to the number of people.

Of course, it is desirable if the channel is aimed at betting / casinos.

Advertising can be expensive, having learned how to buy ads correctly.

For example: I bought ads 3 times in one telegram channel. I bought it for ~\$12.

The first 2 ads brought almost no traffic, with two ads having 5 clicks and 1 registration without a deposit.

However, I did the third commercial just brilliantly. 75 conversions, deposits of \$ 150, profit of 75.

An advertising post is very important, copy it from others if it works.

"Method 4. Uploading long videos to YouTube" ([Click to View](#))

It takes an hour to explain how to create the perfect video that will shoot across several pages.

1win managers give articles about this, but they won't be enough anyway. Start shooting, follow the algorithms, see what the audience likes, if your video has gained views - grab the theme, pour it again, changing it a little! Hype on it!

Ask the manager for an article on how YouTube's algorithms work, and they'll send it to you (I'm not sure if you can distribute their copyrighted articles)

I also want to warn you that you cannot advertise BC in the video or in the description. In the video, you can say subscribe to the telegram channel, and then you can freely promote whatever you want. You can pin a link through a pinned comment, I don't remember exactly if it's possible to pin a link on your main channel, but if you can send a link from a twinkie, that's fine, pin it and that's it. It is best to send a telegram to the link itself. If you develop a YouTube channel, you are rich.

Most of the time, people aren't particularly interested in stupid drifts, but you can try that too. People are quite interested in betting strategies, lucky jet strategies, casino strategies. However, videos with large drifts in BC and violent reactions are also interesting to people. Imagine a ludoman watching YouTube, and there are beautiful slots spinning. He'll want to twist them. You can also order SEO promotion on the forum.

"Method 5. Buying a streamer" ([Click to View](#))

It is undoubtedly a very expensive method, but it is present.

We write to different YouTubers

The audience of sampa, GTA 5 is well suited (there are quite rich people in GTA 5)

The price per stream can reach \$1,000-5,000, but if the YouTuber wins well and promotes the referral link and promo code well, it will pay off.

If it didn't pay off, YouTubers wouldn't get paid such a lot of money.

My monthly statistics, proof of conclusions:
