Looking for API or Tool to Mass Download IG & Youtube Reels

Is there such tool anyways? I don't want to be downloading them manually 1 by 1 like that.

If a Bot can work for you I can create a custom telegram bot that allows you to download reels from IG or Yt Videos. You could access the bot through the same application, send the link of the video you want to download and the bot would do everything for you.

WFD downloader and JDownloader are both freeware, and can be used to download any amount of reels from any Instagram account. It has the ability to download 2k+ videos without getting any rate limits. Make sure to use cookies login to avoid those limits.

Works for YouTube as well. Works for most social platforms. Always use cookies login for whatever platform you will be downloading from.

Like I'll give all IG reel links or youtube or facebook it will just bulk download them all? Ok then. I'll give it a go when I have time.

Or I'll link my IG saved reels it will just download all?

I can make this using Python.

Custom made code , if you want to add more features

VidmateVideoDownloader - April 11, 2025, 12:34 am

Maybe you can try Vidmate, it is an all-in-one video downloader that can easily download Reels from IG, Youtube or any other website.

JDownloader2 will automatically download any video that is copied to the clipboard... so if you're connect to the platform that you want to download content from, as soon as you copy the link... it will automatically detect it and start downloading that video.

WFDwonloader has a similar feature, but not for individual links.. copy the profile URL, and it will automatically add it to the program when you goto the add section, and it will scrape all the contents from the profile... and then download them all. You need to be logged in via cookies to an account of the platform you want to download the content from, and import said cookies into the program. This allows for unlimited downloading.

I've used both programs to download tens of thousands of videos and photos, from one login. Great old school programs that are freeware.
