Thread: [which Coding Lang with Ethical Hacking?](#)

bagheeraa - December 26, 2024, 11:26 pm

Hello Hackers,

I want to learn Ethical Hacking course, where can I learn free of cost, and what coding Language I should choose with Ethical Hacking?

I also want to be CEH from EC council, after learning and based on Self Study, I will pay only for exam and certification fee.

Hello, welcome to HF

I recommend you to start with Python, it's a versatile language, friendly-user, and you'll understand the fundamentals of coding with it. Then, depending on your job, specialization, you might choose other languages (such as C/C++/Rust/Go/ ...)

I recommend you to read the following thread, I've made it as I wish I had it when I started 6 years ago : <https://hackforums.net/showthread.php?tid=6263412>

You can learn for free on tryhackme.com, there is also a premium version with more content and paths, but you already have many weeks / months of playing with the free version.

CEH is a theoretical certification for pentesters (the exam is MCQ based, and it's not really appreciated by companies). I recommend you to LEARN CEH, but if you need to pass an exam and get a cert, OSCP is more appreciated because it's a practical exam (for pentesters, if you want to become a pentester).

As I said, everything is in my thread, if you still have questions feel free to ask in the thread,

Don't forget to read the [Help Docs](#),

Enjoy your stay
