Thread: [UAPs & Drones are an Earthwide event](#)

Hackers - December 29, 2024, 6:10 pm

After my visit to Antigua, the sightings the last 2 nights, the sightings in beginning of week, and the sightings on our flight back today - along with so many photos and videos of my own...

I can tell you with 100% certainty that the exact same model drones I have seen were in Antigua - the same over CT. The orbs are all over.

I will be sharing more soon once I compile my newest notes, photos, videos.

I want to make this thread because I think what I hear from a lot of people is that they think it's isolated to USA or East Coast or New Jersey, or nuclear bases. It is not.

With my experiences going back to early October, along with widespread videos and photos, I can tell you with no doubt that this is a topic every world government will discuss, and in many cases already are discussing.

This topic needs attention, and as tech gurus and hackers I honestly believe that HF is a good outlet for what I am sharing with you all.

I beg you to please just listen to what I'm saying and look for yourself. Dedicate hours if you can. If you can't get outside or on a flight to monitor yourself over a long period of time then please just ask me technical questions, or for whatever details you want. I can honestly corroborate so many other sightings shared online. This is all real, it's not just me, there are thousands of us trying to get the worlds attention and many people don't care or think we're crazy.

I have an interview with a paper being scheduled soon and I will compile everything, including all of my unshared photos and videos. The governments know about all of this, and anyone can see it for themselves. We can work together to understand, adapt, and thrive in our mutual future. Please just stay open minded, communicate, don't place false blame, and spend time researching this.
