Hi,

Just wanted to brag about my banger trade with Virtuals on BASE! The AI "agent" meta is extremely hot right now.

Pimping - December 29, 2024, 11:48 pm

FARTCOIN will be top 10 meme next year. I've never seen people outside crypto talk this much about a coin besides BTC. Wish I loaded up when I saw it at under \$200m. ?

Azura doesn't have leverage trading yet. This was pure spot trading. Entry price is strange because I've bought and sold out of this position multiple times over the last few months.
