The teaching of the wise is a fountain of life, turning a person from the snares of death.

Knowledge is knowing a tomato is a fruit

Wisdom is knowing not to put tomato in a fruit salad

I agree with this because wisdom provides guidance, nurtures growth, and protects against destructive choices.

They say you are the sum of your three closest friends, so make sure you are hanging out with people that you want to become and that are bettering you!

Surround yourself with positive people, and you'll be positive... life is a mirror.

The universe is full of secrets and strange unexplainable things, the more you know, the more you know you don't know anything.

So interesting as this is literally my life and it took me a long time to cut certain people out and recognize who was toxic and was just using me for my resources/to get ahead. Life teaches you many lessons along the way, but it's how you deal with it or react.

If you want to become wise
You need to recognize truth
So that you see the truth in me
The truth in you
The truth of the world
And much truth will make you suffer
Not many want to be wise
No one really wants to suffer
Some do, not because they want to
But because they want to be aware
Because we want to know
Because of the truth

This title is accurate.

Your environment is everything in life and plays a very strong roll in your decision making and overall mindset.
