Thread: [Looking For Projects. I have a budget. \[\\$1000+\] and I want to invest in something](#)

The title must have cleared most of your doubts. I am looking into buying Projects, both running or dead if you have any. I have a fairly large budget of \$1000+. Please don't waste my time with bullshit ebooks and crackers.

What I am mostly interested in :-

1. RATS/BOTNETS/KEYLOGGERS or any kind of tools.
2. Crypters, [web-based preferred].
3. VPN, offshore hosting related.
4. free items glitches
5. spampages
6. email flooders/sms flooders bombers
5. shipping label bots or telegram stores

Please do not hype the price of the product just by seeing the title to \$1k. I am willing to spend that amount at maximum and not on just anything you have.

If you have a sales thread {on HF or offsite}, please link it here. Please post some proofs of your earnings if you decide to sell it for a high price.

Looking forward,

I have an almost fully fledged RAT made in C++ (server panel, client and builder). Runs without dependancies. Fast. Easy to use. Dont work on it anymore so I could sell it to you for fairly cheap in crypto. send me a PM so we can talk a bit, I can also work on it for you for a small xtra payment
