Nodes Ethereum Address Maker
v1.0.0.0

I created this so you do not need to rely on a centralized exchange or wallet extension/app to generate a new address.

You can use this offline, or visit the [Sellco.in](#) links for client-only address generating.

This program will receive 0 updates unless there is a known bug, but I might spin up a more advanced address management software in the future.

You can verify a seed phrase here:

If you do not want to use the downloadable program, you can generate an address online, here:

Such a weird response ~ You don't.

If anyone is looking for a quick ETH widget, here you go :)
