Nodes Bitcoin Address Maker

Version 0.0.1

I created this so you do not need to rely on a centralized exchange or wallet extension/app to generate a new address.

You can use this offline!

Download Mirrors:

It's easy as ever to spin up software with AI - been dabbling with some C# in between things today.

Thats a cool idea, thanks.

4o really is amazing at code though, massive time saver compared to desperately researching every corner of the internet.

brandowservices - January 2, 2025, 11:25 pm

thanks checking it out i really will make a recommendation for it

Shapeless - January 4, 2025, 4:16 am

Supernice, just a question: Theres source as well for this in the zip right?

I noticed theres not, maybe a good idea let us compile our own if possible, it feels scary letting someone elses software generate my wallet, what if it has delayed upload of the private key or what not, maybe im wrong but i think better idea if youre willing let this be open source.

I can share source, I don't mind.

No weird network requests or anything but yeah I can understand the concern

I'll package up the source soon and add to thread

Stanley - January 31, 2025, 7:21 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
