I wonder what type of stuff are gonna be hosted on this

I do not know how to tag people, <https://hackforums.net/member.php?action=profile&uid=3995095>
yeah idk how

Did you know, the memz virus delete both the MBR AND all existing partitions on the machine.

How can I quote someone if I am the only one on this post?

Losing all partitions is nutty, and I don't know much about how they did it

AI malware is a hot topic - auto detecting and protecting, as well as malicious scripts that can

mutate based on environments

I am not sure if this is still available, but:

- Quoted you doing the wrong thing because the domain is mine (I am joking, I have no idea what to do with it just seems like a fun contest)

- Tagging [Mooooookie](#) because he is probably the only one that won't get mad at me, and is a vendor

- Something related about malware: to test correctly against an AV, I suggest simulating the entire attack chain, otherwise you may get incorrect results. I am not a big fan of the automatic scanners because they are flawed, with internet connection you risk your payload getting leaked to security vendors, while without internet you cut off the legs of any competent AV (cloud features).

[mention=2811977] [7](#) - anyone else in Fallen want to get in on this?

I am realizing now I never put an end date on this giveaway.

This will end on 3/1/2025. Any posts after 3/1 won't be considered.

Ah no problem! I don't mind

If the thread had 100 pages of replies I'd just write a script to find a qualifying post for a random selection.

Thank you!!
